YOU FOUNDATION
EDUCATION FOR
CHILDREN IN NEED

YOU Foundation is an initiative of
UNESCO Goodwill Ambassador
Dr. Ute-Henriette Ohoven.

YOU supports and realizes worldwide programs and projects that aim for measurable added value for the countries, beneficiaries, the project-related SDGs and the donors – YOU-WIN-4. UNESCO’s-Educational-Agenda, equal chances especially through SDG4 (high quality education) are our focus work. The OUTCOME and the long-term effect, IMPACT, are always the goal.

Through social investments we empower children, youth and women, whole communities, to **help for self-help.**

Our program developments & implementations are participatory and self-sustaining, if needed. They are developed specifically according to the needs of the countries and individual framework conditions.

RORI in cooperation with:

a B-Corp with deep knowledge of the education sector in West Africa, and a track-record for delivering outstanding learning outcomes for students.

RORI

The AI-personalized
learning support for
those that need it most

- **RORI** is an **AI-powered chatbot** that provides personalized maths tutoring via WhatsApp.
- Since June 2022 **RORI** is already reaching in this first phase **1750 students** with **over 100,000 interactions.**
- It is being built by **Rising Academy Network**, a longtime partner organization of **YOU Foundation – Education for Children in Need**, both with deep knowledge of the education sector in West Africa, and a track-record for delivering **outstanding learning outcomes** for students.
- The need and demand for personalized tutoring across low and middle income countries is enormous. We have the networks and the platform with the potential to reach and **support millions of students who need it.**

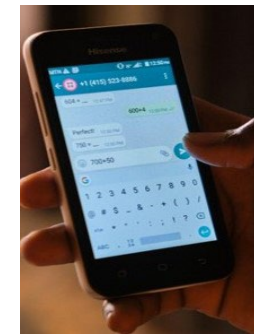

OUTCOME:

High quality, high-dosage tutoring is one of the best ways to improve education outcomes. But despite the growing size of the tutoring market, **access to high quality provision is out of reach for the vast majority of children.**

With RORI we can change that.

RORI

delivers for now
personalized **MATHS**
tutoring via WhatsApp

- **RORI** asks students practice questions and understands their answers. It then **automatically adapts** its content to find the right level of difficulty.
- Students **progress at their own pace.**
- If they get stuck, **RORI provides explanations.**
- Each time a student engages with **RORI**, it **picks up where they left off.**
- **RORI** is friendly! Creating powerful, motivation-building relationships.

**With You, we want to reach
2m+ students by 2027,
and 5m students by 2030!**
